

ALGEBRA SEMINAR

No Quantum Symmetry, Part 1

Chelsea Walton
Temple University

ABSTRACT: In this series of talks, I will describe various settings of “No Quantum Symmetry”, that is, when a Hopf algebra action on a quantum algebra must factor through the action of a group algebra (or, more generally, of a cocommutative Hopf algebra). The results are pretty simple to state, so the focus of these talks are the techniques used to establish these results

MONDAY, MARCH 7, 2016
1:30 – 2:30 PM
ROOM 617, WACHMAN HALL
DEPARTMENT OF MATHEMATICS
